

WipeMobile Volume is the most advanced product on the market, designed for processing large volumes of mobile devices. It consists of three integrated services and reporting with flexible integration options and APIs.

Diagnostics

Automatic and extensive mobile device testing, including device grading with minimum human interaction; 2-3 minutes per device.

DGS

Reporting

is a web reporting tool that shows real-time statistics. It can be used for monitoring and business follow-up. Provides full audit trail.

Report

Verify

Verify

checks for device locks and verifies against GSMA's Global Blacklist Registry for stolen devices before they can enter your pipeline to increase buyback profit.

Eraser

Eraser

Permanent erasure of all the sensitive user content. Up to unlimited (recommended 32) phones or tablets can be simultaneously erased.

Why WipeMobile Volume?

- ✓ **Cost efficiency and performance:** Product and process efficiency with minimum labour costs
- ✓ **100% certified content erasure:** ADISA certified mobile content erasure product guarantees data security
- ✓ **EU GDPR compliant**
- ✓ **Automatic updates:** No service breaks
- ✓ **Fast and easy to use :** "One Click" user interface
